NetDania FinTech Solutions

NetDania NetStation

Trading Platform
Analysis Platform
Information Platform

NetDania NetStation is a user-friendly trading, analysis and information platform, deployable in multiple roles.

NetStation is deployed by retail brokers as a trading front-end for their clients, and it is used by large banks and brokers for distributing real-time quotes, news and custom information to internal and external users alike. Besides information from your organization, NetStation may be configured with data from NetDania, third party providers, and global exchanges.

Our FinTech Solutions

NetDania offers a wide range of solutions, including financial workstations and information terminals, trading platforms, charts and applications for both desktop, mobile and website use.

NetDania solutions are feature-rich and cost-efficient through their flexibility and modularity. They come with extensive branding and hosting options.

The NetDania applications include the world's highest user rated mobile app within finance, and the world's fastest HTML5 chart.

About NetDania

Founded in 1998, NetDania pioneered streaming price technology, and have since delivered solutions to global Tier-1 banks, brokers, currency managers, and analysts. With a strong position within corporate FX and trading, our technologies are increasingly used by banks, brokerages and analysts as better alternatives to expensive legacy systems for trading, news and analysis.

At NetDania, we take a Scandinavian approach to our work with a keen eye for design and with punctuality and mutual trust as our key values.
